N°: 232/26

Note Verbale

The Embassy of the Kingdom of Morocco presents its compliments to the Budapest University of Technology and Economics, and has the honor to inform that, in accordance with the Memorandum of Understanding between the Kingdom of Morocco and the Republic of Hungary, the Moroccan Agency for International Cooperation (AMCI) has allocated a quota of 15 scholarships for the academic year 2026/2027, to Hungarian students wishing to pursue higher education in Moroccan public institutions.

To enhance transparency and efficiency in the application process, AMCI has implemented a digital platform for scholarship applications. In this regard, the competent Hungarian authorities are kindly requested to designate coordinating officers (including full names, positions, email addresses, and mobile phone numbers) who will be responsible for processing applications through the digital system. AMCI will subsequently provide personalized access codes to the designated officers via their official email addresses.

The application deadline for preregistration has been established for the 15th of June 2026, and submitted files should be organized into two categories: the principal list corresponding to the notified quota, and a waiting list containing additional candidates. All applications must be pre-validated and transmitted through diplomatic channels before being entered into the digital platform.

It should be noted that French is the primary language of instruction in most Moroccan educational institutions, particularly in scientific, technical, and economic fields. Students who do not possess adequate French language proficiency will be required to complete preparatory French language courses during the 2026/2027 academic year in appropriate centers within Hungary before commencing their studies.

Available fields of study include Medical Studies, Paramedical Sciences, Business and Management Sciences, Engineering and Technological Sciences, Agricultural and Veterinary Sciences, and Architecture. Programs in Arabic Language and Literature and Islamic Studies are conducted in Arabic, while Legal Sciences may be taught in either Arabic or French.

For comprehensive information regarding Moroccan educational institutions and application procedures, the following resources are available:

- Moroccan Agency for International Cooperation: www.amci.ma
- Ministry of Higher Education, Scientific Research and Innovation: www.enssup.gov.ma
- Office of Professional Training and Labor Promotion: www.ofppt.ma

The Embassy would be grateful if the Budapest University of Technology and Economics could communicate this information to their students, and ensure compliance with the prescribed modalities and deadlines.

The Embassy of the Kingdom of Morocco avails itself of this opportunity to renew to the Budapest University of Technology and Economics the assurances of its highest consideration.
