

Think like a hacker, be a cybersecurity Superhero

**2-WEEK SHORT PROGRAM 2023 FROM
JULY 10TH TO 21TH**

Let ESAIP make you a key player in building a safer
world for our data and networks!

At ESAIP this summer, with
International Experts, develop
your understanding of Networks
and their protection :

-  Knowledge on Networks and
their vulnerabilities
-  Planification, preparation
and execution of a
penetration test

BASTILLE

DAY :

Enjoy French
national day
on the
July 14th

INCREASE YOUR KNOWLEDGE IN ETHICAL HACKING

ESAIP Bilingual Graduate School of Engineering aims at giving students firsthand insight into Digital Engineering and covers current trends and issues in the field of Cybersecurity, Big data & Artificial Intelligence and IOT.

Learning outcomes

- Being able to use the best tools to analyze a network and identify its main weaknesses.
- Knowing the penetration technics and how to test the vulnerability of a systems.

Subjects covered

To become a key player in cybersecurity understanding and network protection , this summer camp will cover topics like :

- Introduction to cybersecurity and network knowledge
- Systems Hacking Methodology
- Web Hacking (Application Hacking and Server Hacking)
- Security of Cutting Edge Technologies

Our program includes

- 48 hours of intensive exchange with international experts
- 8 days of courses with 2 x 3 hours sessions
- Theoretical and Practical sessions
- Company visits and excursion to discover French and regional culture.
- A certificate of attendance will be delivered and after assessment you will get 5 ECTS

1490 €
Tuition fees
+
accomodations

Esaip partners,
benefit from
10 %
reduction !

- Most of these topics are detailed during the different semesters of the Computer Engineering program at ESAIP in collaboration with teachers and experts from academic and business sectors.
- Digital Engineer degree now offers a full academic year taught in English. You can join the program through bilateral and Erasmus exchange.
